FAQ

Q: Why is it important to do maths with my children?

A: You are the most influential person in your child's life. S/he listens to you more than anyone else.

Q. But maths is the teacher's job isn't it?

A: Well yes, maths is, but numeracy is the responsibility of everyone, in the same way as spelling is all our responsibilities.

Q: OK but I was never good at maths at school.

A: No but you now have life experience and that is why you are so important.

Q. How do I make it fun?

A. How about a family maths night, for one night per month, make it a fun family affair.
